## Professional Summary

I am an imaginative designer with excellent analytical, research, and collaboration skills. I have over 4 years of experience in woodworking where I have designed and built a coffee table, entertainment center, guitar cabinet, and a home desk. Throughout the past three years of design school, my drafting, sketching, modeling, and rendering abilities have developed into some of my strongest skills. I enjoy problem solving and I constantly try to push my designs further by thinking outside of the box and being resilient. I believe design is not about pleasing everyone, but about touching the people that are willing to be open to the new and beautiful innovations that we as designers come up with.
